Dear BCMB3100 Students-

This is the second part of the Biochemistry & Molecular Biology Department assessment of the BCMB 3100 course. You participated in the pre-assessment in the beginning of the semester. We now need to conduct the post-assessment to collect data on the understanding of biochemistry concepts of students in BCMB3100. To accomplish this, we are asking the students to complete the post-assessment.

You will earn extra homework credit points for doing this. These points will contribute to your end of course grade.

- The password is: fall2019

Please do not share the link or password with anyone or discuss the assessment with anyone. It is important that your responses are an honest reflection of what you know so please do not use any outside resources, such as websites, textbooks, or notes.

Your responses will be compiled with the responses of other students in class and used to make decisions about how to improve the course overall. Your responses will not be used to make judgments about you or any individual student.

Thank you in advance for completing this assessment and for taking it seriously!

Please complete this by the end of Reading Day, December 5th.

Thank you!

Drs. Mohnen and DerVartanian
