Pre-assessment Homework
Must be completed by end-of-day Thursday, August 22, 2019 on-line.
See below for details.

Dear BCMB3100 Students

The Biochemistry & Molecular Biology Department is conducting an assessment of the BCMB 3100 course and we need your help. We would like to collect data on the understanding of biochemistry concepts of students in 3100. To accomplish this, we are asking students to complete an assessment at the beginning and end of the semester.

Completion of the pre- and post-assessment are homework assignments. You will receive credit for two homework assignments by completing the assessments. Each assessment contains 21 multiple-choice questions about biochemistry ideas addressed in 3100.

You have 30 minutes to complete the pre-assessment at this link:
https://ugeorgia.ca1.qualtrics.com/jfe/form/SV_3P0NrpKq4R2nmjr
The password is: fall2019

Please do not share the link or password with anyone or discuss the assessment with anyone. It is important that your responses are an honest reflection of what you know so please do not use any outside resources, such as websites, textbooks, or notes.

You will receive the post-assessment link at the end of the semester. Your responses will then be compiled with the responses of other students in class and used to make decisions about how to improve the course overall. Your responses will not be used to make judgments about you or any individual student.

Thank you in advance for completing this assessment.
